

FOXDOG STUDIOS

ROBOT CHEF

**A fully interactive cooking,
comedy and technology show
performed on Zoom**

**Control a DIY robotic kitchen through
a Zoom call!**

**Work together to cook a delicious meal
using fire, a taser and a sausage
cannon**

**Play along
in your browser on
your phone or computer (no app)**

**Based on Foxdog Studios
award winning
live comedy show**

**Viewers draw an avatar on their
phones and control them to operate
robotics in an augmented
reality video call**

How does it work?

During the show we instruct viewers to go to our website, through which they can play games and control the robot. Everyone watching gets to help cook.

Do I need to install anything?

No installation required, it's all done in the web browser.

Are there any tech requirements?

No we show the games and robotics through our webcam in the call, and all we need is to be spotlit.

What's the maximum capacity?

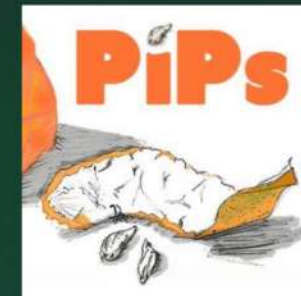

We've built our tech to support audiences of 20 to 300 or more.

Is it Zoom only?

No, we can perform on any video call platform, (e.g. Google Meet, Microsoft Teams).

"It was really a big success from my point of view and definitely something everyone will remember"
Daniel Reuss - Delivery Lead - Adidas

"I got to virtually fire a veggie sausage into a funnel what more could I want from a conference"
Miriam Leach - Lead for PiPsNW
